

Dubious science !

Categories : [Climate Change](#)

Date : March 5, 2013

St Seraphim Rose showed so clearly in his book "Genesis, Creation and Early Man" how the science of his times (so easily embracing the theory of evolution) was hijacked to serve specific interests and agendas ! Today, with all the geo-engineering experiments (HAARP, Chemtrails, ClimateGate etc) it is so much more obvious who the science of today really serves - the coming scientific dictatorship !
