

# Christine Lagarde at Davos 2014 - a RESET is coming !

Categories : [Cripto-Currencies](#), [Political](#)

Date : January 31, 2014

The IMF director mentions the RESET for the first time, and what she is saying is pretty clear:

*"Reset in the area of monetary policies, a reset in the sense of accommodating monetary policies that will have to be reformulated, be moved either back to their old territories, be more traditional, or be of a different kind (i am sure central bankers will be able to comment on that)."*

Starts at minute 9:11 (?) - she is clearly referring to the fact that the world monetary system will have to be restructured either base on a more traditional approach (gold based?) or be something completely new (bitcoin style?).

We believe it will be a combination of both !
