The Pope is relentless in pushing his Liberation Theology agenda, otherwise known as Christian Communism or Spiritual Marxism. On this subject we wrote numerous articles, please take a little time to read them if haven't already.

The greatest iniquity the world has seen, the financial collapse due to bankers greed, is about to hit, and soon these forces of darkness will take over the world and ask everyone to bow down to the communist beast, in the name of "peace and justice". The time is short, the urgency has never been more dire.
