

We are being censored !

Categories : [Political](#)

Date : September 3, 2015

It has been brought out to our attention that orthodoxaustralia.org is currently being filtered out from emails, public and private institutions internet, and search engine results. Emails containing links to our website will most likely not reach the intended recipients, and also emails we send out from our domain do not reach their destinations either. It appears we are being purposely targeted and censored. When sending emails, please do not paste links inside, but rather instruct the recipients in words to come and visit our website. We still seem to be receiving incoming emails.

There are also many hack attempts which we automatically log, detect and block based on the IP addresses within seconds.
