

Federal Reserve to hold emergency meeting on Monday

Categories : [Political](#)

Date : November 21, 2015

This sounds a bit reminiscent of the emergency meeting they held during "Lehman Brothers" "events". The reason they give for their "closed" meeting seems to be just dust in the eyes:

So something else must be happening here. If we were to speculate we would say it may be related to COMEX running out of gold; or maybe about the "Audit the Fed" bill that just passed in the House of Representatives; or some big institution may be on the verge of collapse, like Glencore; or maybe about emergency funding for ISIS who lost all their oil trucks in air raids; or maybe the whole debt (financial) market is about to blow up:

Or maybe it is just about the Earth's magnetic poles shifting drastically. Who knows?
